

Scoreboard Settings

How do I get the teams colors on the scoreboard to match the uniform colors of the teams (if I don't see their colors in the selections available on the app)? Or how do I create custom colors for the teams on the scoreboard?

You can use any color by entering in a HTML HEX color code available at the bottom of the "colors" screen in Scoreboard Settings. Here is a good website where you can pick the color you like and then copy the HTML HEX color code needed to enter into ScoreCam: [HTML Color Picker](#).

To enter the color code on ScoreCam launch Scoreboard Settings -> tap on "Team Names, Colors & More" -> then tap on which color you would like to change (Team 1 Color, Team 2 Color, Score Panels Color, Background Color, etc.) -> then enter in the color code at the bottom of the page.

One day we will come up with a color 'picker' to make this easier, but for right now, this is the solution.

Unique solution ID: #1045
