# Live Streaming

How do I set up ScoreCam to use the Live Streaming Service Dacast?

It's fairly simple, as far as Live Stream Setup goes. Here is a link to reference as well. (Perhaps someone can convince Dacast to post these instructions on their website :)

On Dacast:

1. Get to the "Encoder Setup" Page. You should have something similar to this:

Live Streaming

On ScoreCam:

1. Go to: Settings > Live Steaming Setup > Add Account...
2. Change **Name** to 'Dacast'
3. Select 'Other Service' for **Streaming Service Type**
4. For **Stream Link**, use Dacast's 'Server' field
5. For **Stream Key**, use Dacast's 'Stream Key' field
6. For **Username**, use Dacast's 'Username' field
7. For **Password**, use Dacast's 'Password' field
8. For **Authentication Type**, use 'Limelight' (llnw)
9. Tap **Done** and then change the **Selected Account** to the new Dacast service
