

Live Streaming

Is there a way to record the games without livestream and not have the controls show up?

Yes. To disable (turn off) Live Stream go to Scoreboard Settings -> Live Streaming (Subscription) -> then disable "Enable Live Stream."

To hide the controls, go to Scoreboard Settings -> Scoreboard Remote -> then enable (turn on) "Hide Controls when Connected." Then go back to the video screen and swipe right anywhere to hide the controls. To get the controls to show up again, swipe left on the screen.
