

General

What are the limitations when no In-App purchases are made?

It is highly recommended to use the 1 week FREE trial when evaluating ScoreCam, because, after all, it is FREE and you get FULL functionality of the version you purchase.

However, if you have not made any In-App purchases and do not want to use the FREE trial, you are limited to 2 minutes (or 120 seconds) of video recording time and do not have access to the PRO features or Live Streaming features or Branding features. In addition, you are not able to make any personalized modifications to the scoreboard and you are not able to use the Scoreboard Remote features.
