App Settings

Where do I find videos that ScoreCam said were saved or recovered but are not showing up in the Photos app?

On the ScoreCam app, tap the library icon (at the top of the screen next to Settings), and then tap "Recovered Videos" at bottom of that screen and you should then be able to view any files that did not save to the Photos library directly.

You can then "Select" those files and tap the Share icon at bottom left and then save the files to the Photos library.
