

# Scoreboard Remote

## How do you connect a remote to ScoreCam?

Before downloading both [Scoreboard Remote](#) to [ScoreCam](#), make sure both devices meet the following requirements and support BTLE (Bluetooth Low energy or Bluetooth 4.0):

- iPhone 4S or better
- iPad 3rd Generation or iPad Pro
- iPod Touch 5th generation or newer

In addition, verify bluetooth is enable on both devices. From an [Apple Support Document](#):

On your iOS device, go to Settings > Bluetooth and make sure that Bluetooth is on. If you can't turn on Bluetooth or you see a spinning gear, [restart your iPhone, iPad, or iPod touch](#).

If both devices meet this criteria and bluetooth is eabled then, to connect, you do the following steps:

On the **Scoreboard Remote** device:

1. Launch Scoreboard Remote
2. Tap the "Tap to Connect to ScoreCam" area

On the **ScoreCam** device:

1. Launch ScoreCam
2. Tap the bluetooth icon in upper left hand corner
3. The Scoreboard Remote device will now show up in the list of the "Scanning for Remotes" screen
