Live Streaming

YouTube (API) has been working fine until recently. Why can't I live stream anymore?

You are likely hitting a "User requests exceed the rate limit" issue with YouTube which basically means you have exceeded the threshold for live streaming for that day. The solution is to try again the next day.

You can get this if you are constantly testing the stream as YouTube only allows so many "starts" before you get cut off and duration doesn't matter.

Unique solution ID: #1101
