

General

What package do I need to purchase to allow me to video a game and start/pause multiple times, yet only have a single recording?

Any of the In-App purchases will allow you to video a game and start/pause multiple times in a single recording. The Starter Sports Pack will allow you to do this as it offers basic recording features. The PRO version will allow you to do this, as well as give you access to more features/scoreboard designs. Additionally, if you want Live Streaming you must purchase either the Live Streaming/PRO version or the Branding/Live Streaming version-- both versions include all PRO features and are available for monthly/yearly subscriptions.

The PRO and Starter Sports Pack are both one-time charges that last indefinitely.
