

General

I just recorded a video but can't get it to save to the photo library on my iPad. Is there another way to retrieve it out of the local files area of ScoreCam? When I try to save to the photo library I get an error code: Error! Video could not save; Error domain=PHPPhotosErrorDomain Code=-1"(null)"

You can get to the video if you attach your device to a computer and use iTunes. See Apple's official documentation: <https://support.apple.com/lv-lv/HT201301>

Here are the steps for ScoreCam:

1. Open iTunes on your Mac or PC
2. Connect your iPhone, iPad, or iPod touch to your computer using the USB cable that came with your device
3. Click your device in iTunes. [Get help](#) if you can't find it
4. In the left sidebar, click File Sharing
5. Select the ScoreCam app from the list which is displayed. Video should show up in the "ScoreCam Documents" area
6. Select the movie and select the "Save..." button to save the file
